

Vodka Press

1.5 oz of Vodka into a Collins glass filled with ice.

1.5 is the standard amount of a shot of alcohol, so feel free to use the shot glass as your measuring cup.

Pour in about 4 oz of soda water, it does not have to be exact, just however much soda water you want.

Pour in about 4 oz of 7up.

The ratio between soda water and 7up is different for each person, but for a basic vodka press, 50/50 is a good starting point.

Serve with a lime wedge to garnish.

OPTIONAL: You can also add a splash of grenadine to make it more of a pomegranate press,
